### CZAR'S FAMILY READY TO FLEE

German Squadron Sighted in Baltic Sea Near Russian Coast.

WITTE PLAYING LAST CARDS

St. Petersburg, via Eydtkuhnen, East Prussia, Dec. 5.-It is reported that a German squadron has been sighted in the Baltic sea, near the Russian coast. Rumor attributes the appearance of the squadron as preparatory to the flight of the Russian imperial family.

Agrarian and anti-Jewish outbreaks are reported to have occurred in the governments of Chernigoff, Terek, Kurks and Kasen.

The garrison has now been reinforced by 42 battalions of infantry, 15 squadrons of cavalry and 12 machine gun batteries. The city is divided into four districts, under Generals Osaroff, Dubenski, Sterma and Trodski, respectively. The troops now in the city number over 20,000.

The government, it is reported, narrowly frustrated a plot whereby 1000 armed men had arranged to raid the state treasury. One of the conspirators, it is said, betrayed his fellows, whereupon the leaders, knowing that their attack could be repulsed by the troops with great slaughter, abandoned it. The existence of this conspiracy led to a report that martial law would be proclaimed tomorrow (Tuesday). but this is authoritatively deried.

The extension of the strike of the telegraphers to the postal system is complete, and the paralysis of busimess is increasing the danger of a financial crisis.

The strike of the Moscow telephone operators, who cut the wires and tore up the poles, has severed the last means of communication with the an-

government and the moderates and deer. the extreme elements can stand. If this fails to stay the headlong march of events, the proclamation of a readymade constitution might be tried as the last card. Then nothing would re- cisco has condemned 4000 pounds of main except the proclamation of a eastern turkeys, owing to poor refrigdictatorship. The fall pig in limited numbers can be safely handled and with some profit on every farm where grain is grown,-John N. Jamison in National Stockman.

Bedding Down Dairy Cows. The question of bedding down the dairy cows during the winter season, when the cows are so closely confined, is a serious problem recognized by every dairy cow owner. The Maryland station reports carefully conducted tests with various bedding material, such as hay, sawdust, straw, shavings, etc., and concludes that as an ideal bedding stuff sawdust stands first and shavings second. It recommends the feeds instead of wet feeds and making use of hay and straw on farms when the chickens scratch for what they eat they are to be had conveniently and the deaths were reduced to a small cheaply, but if the bedding is to be number. purchased it is well to buy shavings

at \$6 or \$7 per ton. One cow will need 1,100 pounds of shavings in twelve nonths.-Inland Farmer.

Grinding the Grain. The comparative digestibility of dif-

Grinding Corn For Steers.

Experience shows that whole corn is better than ground corn to be fed to on full feed and it is desired to push them as rapidly as possible then it will, without doubt, in a great majority of cases, pay to grind corn for them and to feed with it more or less glimeal or other concentrated products rich in protein.-Tribune Farmer.

Feeding Turkeys.

Barley and corn soaked or bolled for short time constitute the major portion of the ration used in fattening 'Phone, 577 turkeys at the Minnesota experiment station. Excellent results have been obtained from the use of these grains in this manner. It has also been found that if the turkeys are kept in a slightly darkened room and fed heavily for about three weeks the quality of the flesh will be very much improved, and they will generally pay for the feed in extra weight,-Michigan Farmer.

Why Winter Chicks Die

The English poultry expert, E. Brown, has concluded that the broiler chicks etc. Keeps constantly on hand fine funeral supplies. die chiefly during the first twenty days from want of exercise. By using dry

The J. V. Hawkin's HAIR GROWER &

Has proved to be a fortune to many of the unfortunates, who are to-day delighted with its wonderful results. The merits of this great hair preparation naturally places it in a sphere all of its own, and the glowing terms in which our patrons speak of it reassures us of its satisfactory results. We can well boast of a large patronage throughout this and other States and also enjoys the commendation of the very best white and colored people in this immediate community. In order to convince the most skeptial readers of the merits and results of the J. V. Hawkin's Hair Grower and Restorer, we will from time to time produce in print the photographs of those giving us permission to do so, who have used our preparation and are to-day

among the many bearing witness of us genuine qualities. We do not desire the correspondence of these expecting a mirable or adviring unreasonable. Our preparation is a natural and pure compound, the ingredients of which we would not hesitate to put in print. We will just here remind the public that the United States Government has placed national patent rights on our hair preparation by which it is projected and we are in turn responsible to the government for hon est methods and square dealings.
